

3-HOUR LIVE WORKSHOP

MAHD FOUNDATIONS AND FIT TEAM WORKSHOP

INTRODUCTION

This in-house interactive live workshop is a great way for a team to gain a fast, in-depth understanding of the MAHD Framework to determine if it's the right approach for your project or organization.

PURPOSE

- Build a common understanding of agile for hardware and the MAHD Framework
- Explore the application of MAHD on your projects
- Get key questions answered

WHO SHOULD PARTICIPATE?

- 10-15 participants
- Key process, product and technical roles
- Pilot project team leaders

OPTIONS

- Customizable based on goals
- Virtual or on-site options

FOUNDATIONS & FIT WORKSHOP ELEMENTS

PRE-WORKSHOP PREPARATION

To help your team or organization assess the viability of the MAHD Framework, we gather your team's objectives, challenges, and relevant project details under NDA. Using this insight, the MAHD team designs a focused, interactive three-hour learning experience with targeted exercises that demonstrate how MAHD practices can be applied in your context.

WORKSHOP OUTLINE

Part 1: Foundations of MAHD

- What makes hardware unique
- How MAHD delivers benefits
- A MAHD Walkthrough: Step-by-Step
 - Roles: Mapping responsibilities
 - On-ramp: Initiating projects for success
 - Execution: Evolving the solution

Part 2: MAHD Assessment and Fit

- Assessment Review
- Team evaluation of MAHD against organization objectives
- Facilitated discussion of:
 - Likely benefits and challenges
 - Best path to success and next steps

POST-WORKSHOP ACTIVITIES

- Follow-up on open questions
- Guidance for optimal next steps

OUTCOMES TO EXPECT

- Common understanding
- See how benefits are derived
- Build a foundation for success

MAHD MATERIALS

- Organization Assessment
- MAHD Foundations Materials
- Post-workshop Q&A

MAHD FRAMEWORK SUMMARY & NEXT STEPS

PROVEN METHODS & A TRACK RECORD OF DELIVERING RESULTS

INTRODUCTION

The MAHD (Modified Agile for Hardware Development) Framework® is an end-to-end, agile-enabled operating model designed specifically for complex hardware, software, and hybrid product development. MAHD integrates portfolio governance, lifecycle decisions, and execution practices to help organizations deliver customer value faster, with greater alignment and predictability.

WHY IS MAHD DIFFERENT?

- Agile methods optimized for hardware and hybrid systems,
- Goes beyond team practices to integrate portfolio, lifecycle, and governance decisions,
- Scales from pilot teams to enterprise operating models.

MAHD INVESTMENT & FEE GUIDANCE

MAHD engagements are tailored based on desired outcomes, customization needs, participant scope, and intended organizational use. Standard workshops are offered at fixed fees, while most broader programs begin with a short discovery phase to align investment with objectives and provide clear recommendations.

Our goal is to deliver cost-effective engagements that produce fast results and measurable ROI.

HOW ORGANIZATIONS TYPICALLY START

Most organizations begin with one of the following entry points, depending on goals, urgency, and maturity:

→ Evaluation & Alignment

When leadership needs clarity on fit, readiness, value, or direction, MAHD evaluation options deliver direct, cost-effective insight to drive aligned decisions.

→ Pilot & Accelerator Programs

When teams need to prove value fast and build momentum, MAHD Pilot and Team Accelerator programs enables rapid, real-world application of the MAHD Framework within weeks.

→ Interim MAHD Leadership

When transformation demands embedded expertise and execution horsepower, an Interim MAHD Leader works inside your environment to drive faster, context-specific results.

NEXT STEP

Investing time and resources in process transformation is a significant decision. A strong first step is a focused discussion to review your current situation, assess where MAHD fits best, and receive an objective recommendation on how to proceed.

SET UP A MAHD DISCUSSION

To meet with a MAHD expert, find a time directly on our calendar here:
